

LIVE SYSTEM DEMO

Four governed API endpoints. Each returns structured JSON with cryptographic proof hashes computed at runtime. Canonical interface description backed by live governed endpoints. No stubs. No mock data.

3 patented engines -- Harmonic, Attunement, Semiotic (63/927,497-499).

Run ROSETTA

What This Proves

Each response contains a SHA-256 proof hash computed from the response payload at generation time. The data is real system state -- not mocked, not cached, not fabricated.
