Ethraeon Systems™

Connection Coach v0.1

Adaptive Reflection & Feedback System for Coaches and Educators

IN DEVELOPMENT — Target: Nov 9–15, 2025

Purpose

Connection Coach is an AI-powered tool designed to help coaches, counselors, and educators facilitate deeper reflection and emotional awareness in their students. Rather than replacing human judgment, it amplifies the coach's ability to identify patterns, track growth, and provide timely, empathetic feedback.

> **Core Philosophy:** Connection Coach operates on the principle of human-centered AI—it doesn't diagnose or prescribe, but rather helps coaches ask better questions, recognize emotional patterns, and document progress over time.

Who It's For

- **School Counselors & Teachers** — Track student emotional development and reflection patterns across sessions

- **Youth Coaches & Mentors** — Support young people in articulating their experiences and building self-awareness

- **Educational Institutions** — Implement structured, ethical feedback systems that respect privacy and agency

- **Family Support Programs** — Help parents and guardians understand children's emotional development

Core Interactions

Story Intake

Students share experiences through text or voice. The system identifies emotional themes without judgment or labeling.

Student Reflection

Guided prompts help students explore their own feelings and responses, building emotional vocabulary and self-awareness.

Weekly Dashboard

Coaches see patterns over time —recurring themes, emotional growth, and areas where additional support might help.

Privacy-First Design

All data remains local or encrypted. No student PII is shared with third parties. Full parental consent and transparency.

Data Policy

No PII Collection: Connection Coach is designed as a local-first prototype. Student names, identifiable information, and sensitive data never leave the secure environment. All processing happens on-device or within encrypted institutional systems.

Transparency: Students and parents see exactly what data is collected, how it's used, and how long it's retained. Full audit trails available on request.

Development Status

Current Phase: Prototype Development (Nov 3–15, 2025)

Target Completion: November 9–15, 2025

Initial Deployment: coach.ethraeon.systems (demo environment)

Pilot Partners: TBD — Educational institutions interested in ethical AI for student support

Development Milestones

- ✅ Core emotional pattern recognition engine
- ✅ Privacy-preserving data architecture
- 🔄 User interface and coach dashboard (In Progress)
- 🔄 Student reflection module (In Progress)
- 📅 Beta testing with pilot schools (Nov 16–30)

- 📅 Public demo release (December 2025)

Technical Approach

Connection Coach leverages ETHRAEON's Constitutional AI framework to ensure:

- **Ethical Constraints:** No diagnostic claims, no predictive labels, no behavioral interventions without human oversight

- **Explainability:** Every pattern or insight can be traced back to specific student inputs, with full transparency

- **Human Agency:** Coaches maintain full control over interpretation and action —the system provides data, not decisions

- **Bias Monitoring:** Regular audits to ensure the system doesn't reinforce stereotypes or discriminatory patterns

About ETHRAEON Systems

Connection Coach is part of ETHRAEON's broader mission to build human-centered AI systems that enhance human capabilities rather than replace them.

Our Constitutional AI framework ensures that every tool we build respects human agency, privacy, and dignity.
